AWS API count by service

Scott Piper @0xdabbad00

This chart shows the counts of APIs by AWS service, grouped by the categories in the web console. It's interesting seeing how "large" some categories of the AWS ecosystem are that you may not have much knowledge of.

I don't have much knowledge of some areas like the IOT and Machine Learning APIs, and together those have 13% of the total AWS APIs (485 and 534 of 7618). Sagemaker and IOT are each top 5 services by size. This highlights a blind spot for me.
